

DESCRIPTION

Fascial covering of muscle from lateral aspect of thigh

BRAND

OraGraft®

CLINICAL APPLICATIONS

Peridontal Fascia Lata is a unique cell occlusive, resorbable membrane that can be used in areas where primary closure cannot be achieved. Peridontal Fascia Lata has a long history of use in medicine and dentistry.*

*Callan DP. Guided tissue regeneration without a stage 2 surgical procedure. The International Journal of Periodontics & Restorative Dentistry 1993; 13(2):173-179.
